## ComplyGuard Networks Introduces ComplyShield 4.0™

SAN ANTONIO, TX (December 8, 2010) — ComplyGuard Networks Inc, a leading provider of network security and PCI Data Security Standard compliance validation services, today announced the release of ComplyShield™ 4.0. This latest version of the ComplyShield™ is ComplyGuard's fourth generation of its proprietary security tools first introduced in 2003.

ComplyShield™ 4.0 provides a new, easy-to-use interface and a new vulnerability dashboard designed to help merchants, service providers and acquirers manage their risk. ComplyShield™ 4.0 enhances the highly accurate vulnerability scanning for which ComplyGuard is known. Reporting follows the PCI Security Standards Council's new format required of all Approved Scan Vendors.

([https://www.pcisecuritystandards.org/documents/asv\\_program\\_guide\\_v1.0.pdf](https://www.pcisecuritystandards.org/documents/asv_program_guide_v1.0.pdf))

Simplified on-demand or scheduled scanning, easy-to-follow remediation recommendations, and the ability to deliver an Attestation of Compliance with one click makes this latest version of ComplyShield™ a tribute to the continued legacy of superior products and services.

“I am extremely pleased with ComplyShield™ 4.0,” shared Jim Bibles, Director of Business Development for ComplyGuard Networks. “Our goal for the release is to enhance our customers' experience by providing them with an intuitive tool set to help them better understand the security posture of their network and the specific steps needed to be taken to increase it. With ComplyShield™ 4.0 we exceeded our goal.”

### **About ComplyGuard Networks**

ComplyGuard Networks is an Approved Scan Vendor (ASV) and Qualified Security Assessor (QSA) with more than 30 years of combined expertise in network security including vulnerability assessments, audit, penetration testing and web application security. Our intellectual property portfolio positions ComplyGuard Networks uniquely in statutory and policy compliance.
