ComplyGuard Networks' Jim Bibles to Present at MAC 2011 Conference

SAN ANTONIO, TX (April 11, 2011) — ComplyGuard Networks Inc, a leading provider of network security and PCI Data Security Standard compliance validation services, today announced that Director of Business Development Jim Bibles will be a featured speaker at the Merchant Acquirers Committee MAC 2011 Conference in Las Vegas, NV from April 12-14, 2011.

As part of a Payment Card Industry (PCI) panel of experts, Bibles will provide best practices for the development and management of Merchant PCI DSS compliance validation programs for the ISO and acquiring community.

MAC President Deana Rich acknowledges the level of excellence that speakers such as Jim Bibles bring to the event. "I have known Jim for many years and he has been involved in PCI/PA DSS from many angles; he is an industry expert with a great depth of knowledge and I look forward to his insight and contributions to our PCI panel discussion."

"I'm excited to participate in this year's MAC," said Bibles. "It brings together a unique mix of industry professionals to openly discuss risks and challenges that we as payment card professionals will face in the upcoming year and beyond."

The MAC 2011 Conference is touted as the only industry conference focused on payment fraud and risk management. Organizers point to the value of learning directly from industry leaders about solutions being implemented in the "Revolution Against Fraud," the theme of this year's conference.
